

DCM 881

DCM 881 shares its shape & features from DCM 888 with the major difference here being a chair that has a fully upholstered backrest. DCM 881 offers looks that please the eye, quality functionality and elegance all around.

Full Back

A fully upholstered backrest allows guests further back support and comfort. Blending in with modern interiors, DCM 881 works exceptionally well with more permanent banquet seating arrangements for dining purposes.

No Gaps for Guests

Your guests with our chairs will enjoy the benefit of having a lengthened backrest upholstered alone. Having no gaps in between seats and backrests also solves the concern of purses, and other personal belongings to be placed on seats safely. This limits having to worry about items being dropped or misplaced.
